

- `fixed_elem_count`
Number of fixed-size elements
- `fixed_elem_free_count`
Number of free rows for fixed-size elements
- `var_elem_alloc_bytes`
Number of bytes allocated for variable-size elements
- `var_elem_free_bytes`
Free bytes remaining in pages allocated to variable-size elements
- `var_elem_count`
Number of variable-size elements
- `hash_index_alloc_bytes`
Number of bytes allocated to hash indexes

Notes

The `type` column from this table shows the dictionary object type used for this fragment (`Object::Type`, in the NDB API), and can take any one of the values shown in the following list:

- System table
- User table
- Unique hash index
- Hash index
- Unique ordered index
- Ordered index
- Hash index trigger
- Subscription trigger
- Read only constraint
- Index trigger
- Reorganize trigger
- Tablespace
- Log file group
- Data file
- Undo file
- Hash map
